Road Transport GEODIS SOUTHEAST ASIA

GEODIS ROAD TRANSPORT

With more than 20 years of experience in providing road transport services across Asia, we proudly introduce our very own GEODIS Road Transport offering you integrated end-to-end solutions.

GEODIS' large fleet of vehicles and wide network of partners enables us to carry your full and partial loads to neighboring countries by road. These personalized door-to-door services offer you loading space flexibility combined with a seamless and cost-effective method of transportation.

DAY DEFINITE DELIVERY

Day-definite, fully bonded, integrated road network

Linking domestic presence of GEODIS in key markets of SG, MY, TH & VN to support multi-modal gateway strategy.

INTEGRATED ROAD NETWORK

Gateway/hub connectivity

Feeding to major air hubs and seaports, the Network bridges multi-modal solutions through hinterland feeder services to major sea and airports in the region.

FASTER THAN SEA CHEAPER THAN AIR

Centralised Network Management

Fully controllable operations by a direct network management team with end-to-end visibility and reliable network delivering service and cost advantage over traditional air and sea options.

INTRODUCING OUR NEW ROAD SERVICES

RoadDIRECT:

The premium direct all-in road transport service, fastest transit time, with daily departures for complete Door-to-Door connections.

RoadFAST:

Our standard road transport service, fixed scheduled network offering reliable transit times. Departures 2-3 days after freight is received. Both Door-to-Door and Hub-to-Hub options are available.

RoadSAVE:

Our economical road service, for less urgent requirements where departures are 3-4 days after freight is received. Both Door-to-Door and Hub-to-Hub options are available.

OPTIONAL SERVICES TO OFFER

INSURANCE

We look at freight insurance from our customers' perspective. We can provide a tailored solution for specific project scenarios. We also offer competitive rates worldwide as a partner with leading insurance companies.

REEFER CARGO

Our facilities and transport networks are fully compliant with Healthcare quality standards and regulations, including temperature-controlled solutions for the increasing number of products that demand this type of transport.

HIGH SECURITY CARGO

GEODIS offers its customers end-to-end transport and logistics solutions adapted to the nature of High-Tech products in terms of value, security, safety and confidentiality.

DANGEROUS GOODS

Customers who regularly transport these types of goods can make use of our Dangerous Goods Handling service. This ensures safety, environmental protection and regulatory compliance from pick-up to delivery.

CUSTOMS BROKERAGE

International Customs Services

- Import and Export Clearance
- Temporary Clearance
- Intrastat (EU)
- Transit
- Support to Customs Authorities inspection on physical goods

Foreign Trade Document Management

- Preferential origin determination and associated documents
- Origin and preferential document
- Export license application

Pre-Clearing Solutions

- ISF USA (Importer Security Filing)
- ICS Europe (Import Control System)

GEODIS, a leading customs brokerage service provider with headquarters in Paris, France, we offer comprehensive customs and trade compliance services to all our customers.

We have about 900 customs and trade professionals globally to serve our customers with full suite of solutions to meet the increasing needs in customs and trade management.

GEODIS ROAD NETWORK SOUTHEAST ASIA

How Does It Work?

A Seamless and Secure Solution

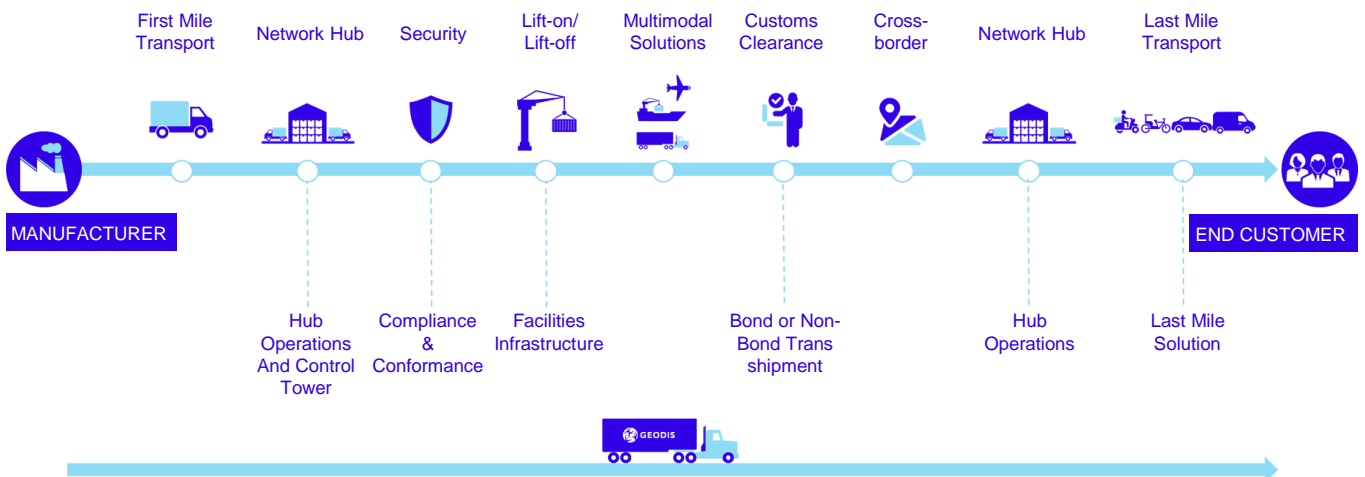

No matter how many countries are involved, we can collect your cargo from any number of suppliers and warehouses and bring them to our consolidation centers. There, we will load and dispatch them via cross-dock services and ship them to different destinations, ready for direct-to-store delivery.

Our FTL containers are sealed door-to-door and are only opened if required by border customs. Our LTL containers are consolidated at GEODIS facilities along the route, and then fed into the main road network by cross-border trucks.

GEODIS Road Transport provides a personalized door-to-door service, offering you loading space flexibility that is fully reliable and seamless.

Full End-to-End Control

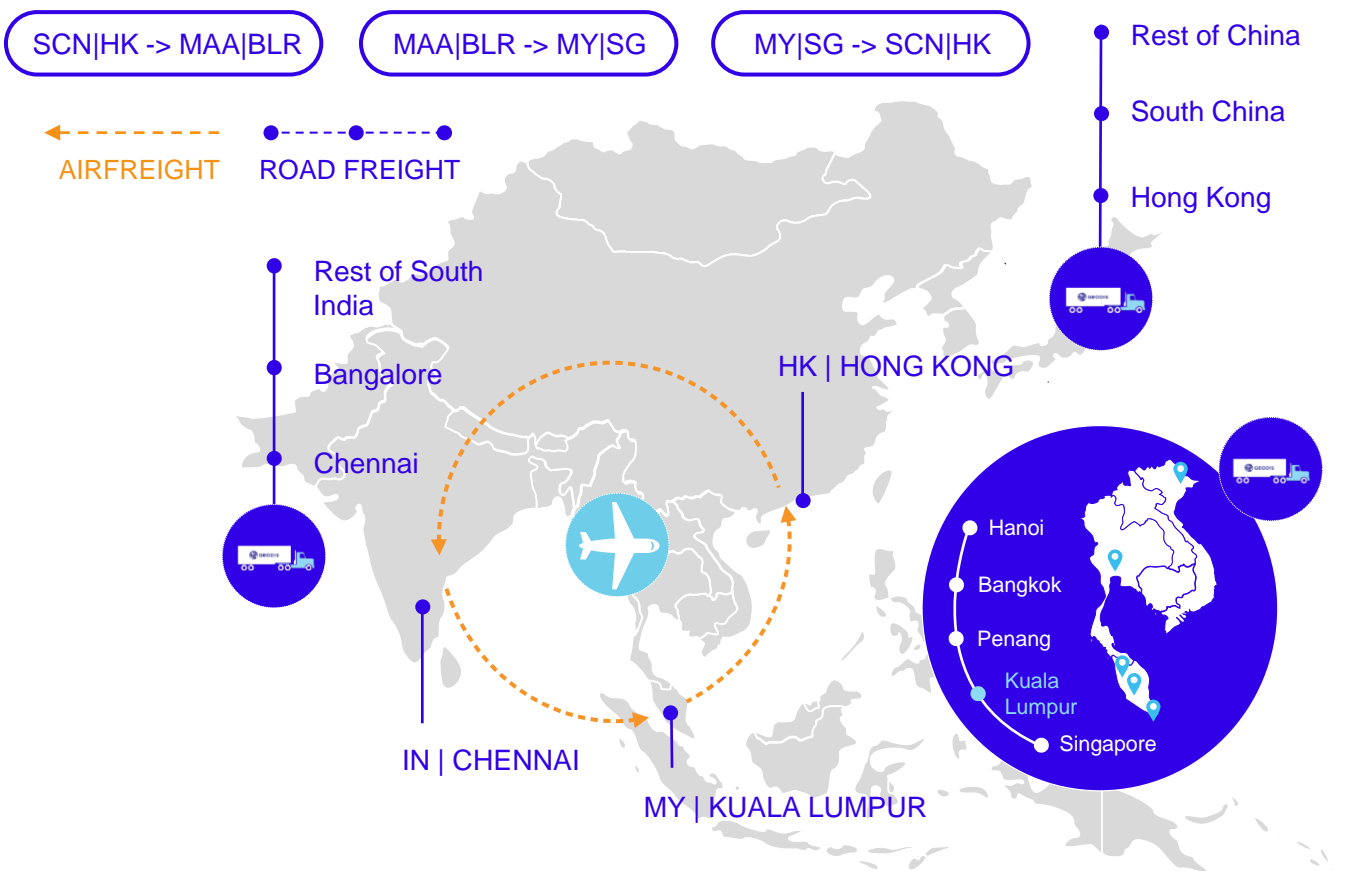

MULTI-MODAL TRANSPORT SOLUTIONS

GEODIS provides flexibility to your solutions

As a pioneer in green logistics and multimodal transportation, we use our expertise to make your logistics more sustainable. Our combined transport service offers advantages such as increased transportation capacities, reduced costs, faster transit times and a smaller carbon footprint. We guarantee seamless, flexible and secure operations, even when shipping large volumes.

MAIN FEATURES OF OUR TRUCK FLEET

Over 30 dedicated trucks

Trailers fitted with air suspension

European Standard Vehicles

Emission Testing

EQUIPMENT OPERATED by GEODIS ROAD TRANSPORT

The standard container used by GEODIS is a 45-foot-high cube, (45'HC) with allowance for a capacity of up till 60m³ or 44 pallets.

Specific containers are used to adhere to the requirements of the international borders to allow for a single truck use for the entire journey.

KEY INVESTMENTS - UPGRADED FLEET

GEODIS is the first in the market with Truck Safety & Assistance Specs feature as a commitment to client's security for drivers' protection.

With the rising demand for our trucking service, we have invested in double-decker installation to our containers to maximize customer's utilization of available space.

| Safety & Assistance Features | |
|------------------------------|--------------------------|
| 1 | Brake Assist |
| 2 | Hill Holder |
| 3 | Airbag |
| 4 | Proximity Control Assist |
| 5 | Attention Assist |
| 6 | Lane Keeping Assist |
| 7 | Stability Control Assist |

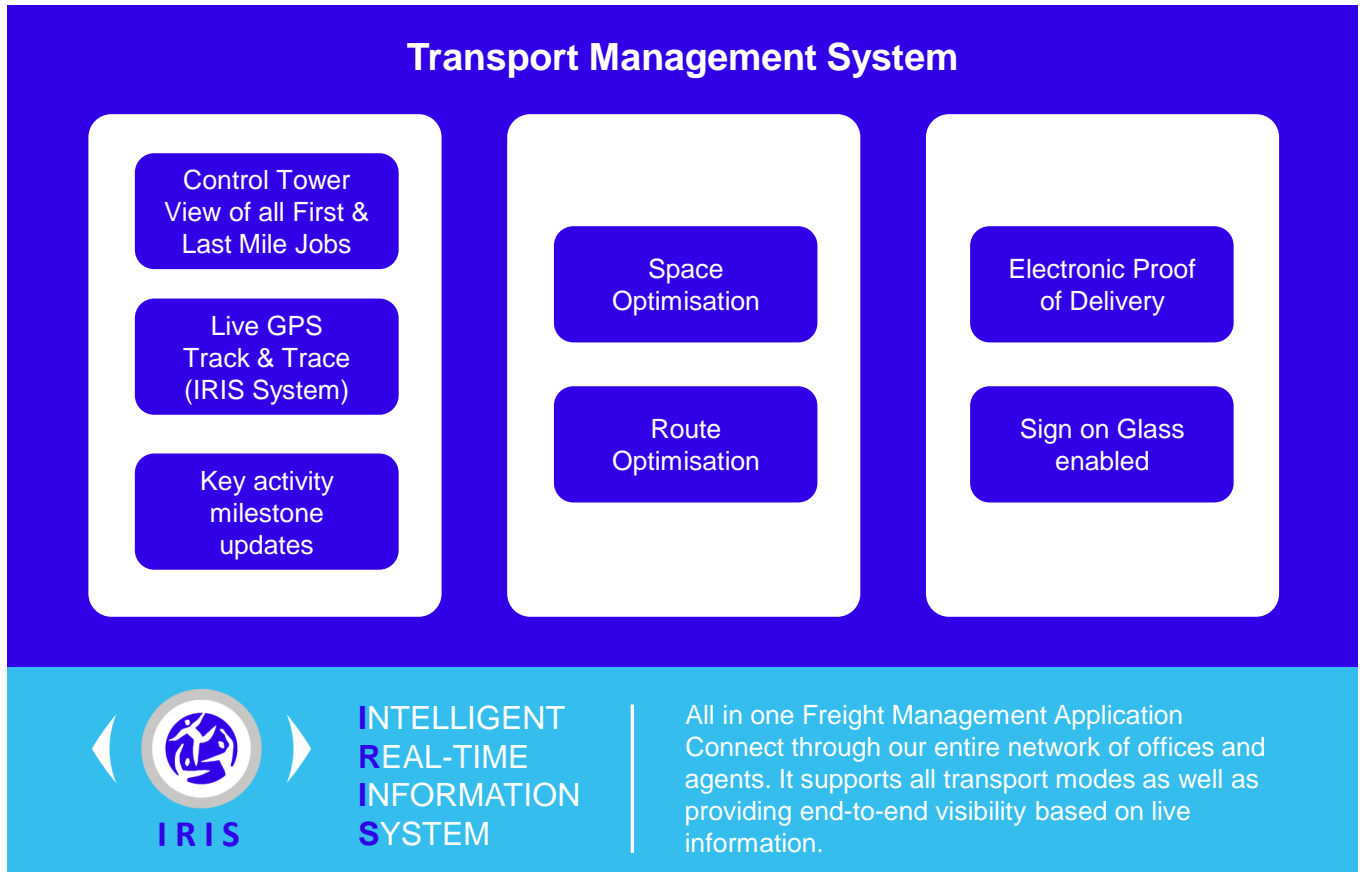

CO₂ Reduction Feature

Our solutions target economic, operational and environmental performance through high-volume loading, continuous operation, accident risk reduction and CO₂ emissions.

With the upcoming new Prime Mover trucks deployed, there will be further reduction in carbon emission.

WHY GEODIS?

As your growth partner, GEODIS is committed to delivering effective security and support for your supply chain. We provide all road and multi-modal transportation operations and their associated logistics.

*Optional services available upon request

WHAT WE CAN DO FOR YOU

SCHEDULED DEPARTURES

- Fixed departures / arrivals

COST EFFICIENCY

- Guaranteed lead time
- Cost effective alternative to air freight
- Improved time to market

RELIABILITY

- Day definite

SECURED NETWORK

- Less touch points
- End-to-End control
- Full control on managing containers
- Industry Leading Standards

WE HELP YOU TO

IMPROVE THE OPERATIONAL MARGIN

By enabling the reduction of the supply chain costs, usually locked in:

manufacturing supplier's network, distribution network, and inventory locations.

ENHANCE THE WORKING CAPITAL

By reducing supply chain cycle time, cash conversion cycle is shortened, and transit times invoice speeds up the invoicing process.

This reduces your inventory holding costs while improving your ROI.

OPTIMIZE THE ASSETS

More frequent departures by road allow you to downsize the warehousing footprint either at origin or destination, or both.

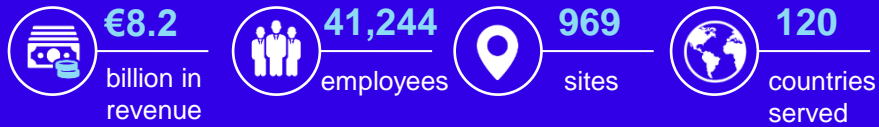

WIN COMPETITIVE ADVANTAGE

Hub and spoke road connectivity offers variability and flexibility in transportation network planning.

This brings your business to an increased speed to market, and ultimately improved customers satisfaction.
