GEODIS publishes its 2024 activity and sustainability report

GEODIS announces the publication of its activity and sustainability report for the year 2024. The voluntary report is structured into three parts:

- The first part presents information about the Group's activity in 2024, including its key figures, value creation model, Ambition 2027 strategic plan, and CSR roadmap.
- The central part focuses on GEODIS's corporate social responsibility policy, outlining the objectives set by the Group and the key elements of 2024 regarding environmental, social, and ethical themes.
- The last part summarizes the performance indicators as well as the concordance table with the European Sustainability Reporting Standards (ESRS) of the Corporate Sustainability Reporting Directive (CSRD).

"With our Ambition 2027 plan, we place innovation, performance, and responsibility at the heart of our strategy. In 2024, the validation of our decarbonization goals by the Science Based Targets initiative marked a major milestone: we aim for a 42% reduction in emissions from our direct activities by 2030, in line with the Paris Agreement. It is by combining operational excellence and environmental commitments that we build sustainable logistics, serving our clients and the planet," said Marie-Christine Lombard, Chief Executive Officer of GEODIS.

The Group engaged the independent firm EY for the verification of data published under the CSRD framework.
