LEVALLOIS-PERRET

GEODIS in Switzerland strengthens its healthcare capabilities and expands its national footprint

GEODIS in Switzerland has achieved a significant milestone in solidifying its healthcare logistics capabilities, obtaining three key certifications in less than six months: ISO, CEIV Pharma, and GDP. These certifications demonstrate GEODIS' commitment to the highest standards of quality, safety, and regulatory compliance in pharmaceutical and healthcare logistics.

These milestones support GEODIS' ambition to further develop its capabilities in high-value and regulated sectors such as Healthcare and Life Sciences, for which Switzerland represents a key European hub.

GEODIS Switzerland's commitment to operational excellence is underscored by its CEIV Pharma and GDP certifications, ensuring strict regulatory compliance, temperature-controlled logistics, and full traceability for pharmaceutical products. This specialized expertise is built upon a robust quality management framework, including ISO 9001, 14001, and 45001. These standards cover the company's core operations, including Worldwide Freight Management, Project Logistics, and Supply Chain Solutions, guaranteeing the highest levels of quality, environmental responsibility, and safety.

At the same time, GEODIS has expanded its national presence with the relocation and expansion of its Zurich and Basel offices, as well as the opening of a new office in Geneva. These new workplaces foster closer collaboration between teams and enhance the company's ability to serve customers across the country.

Designed with sustainability and employee well-being in mind, the offices provide a modern and efficient working environment that supports operational excellence and customer engagement.

"These recent developments reflect our ambition to further cement GEODIS' position in Switzerland and to support our customers in key sectors such as Healthcare, Retail, FMCG and Project Logistics," said David Erismann, Managing Director, Freight Forwarding, GEODIS in Switzerland. "With these certifications, our robust organizational structure and our expanded presence, we are enhancing our ability to deliver reliable, compliant and innovative logistics solutions."

With these milestones, GEODIS further reinforces its role as a trusted logistics partner in Switzerland, supporting companies with resilient and high-quality supply chain solutions and ensuring a better way to deliver.
